

How are payouts determined?

Our Customer Support team is happy to help with all issues related to billing and technical support, but they cannot change the outcome of the gameplay for anyone.

Emails regarding the odds in our game will not receive a reply.

To match the experience of playing in a real casino, our odds are all based on standard casino rules and averages.

The odds are always the same for every player . All slot spins have the same probability of success or failure for everyone regardless of your account, player level, Coin amount, or how long you've been playing
